PROFILE

Highly skilled software automation tester and developer with expertise in designing and implementing automated testing solutions using industry-standard tools like Selenium, Appium, and Cucumber. Proficient in black-box, white-box, and grey-box testing methodologies, creating comprehensive test plans, cases, and scripts for thorough coverage. Experienced in software development with proficiency in Java, and JavaScript, and knowledge of SDLC and agile methodologies. Proven track record in defect identification and reporting, collaborating with developers, and actively participating in code reviews. Strong problem-solving and debugging skills to improve complex systems. Seeking an opportunity to contribute as a software automation tester and developer for high-quality software products.
